

PROJETO PHYSIS

By Grupo Physis

SOBRE O PROJETO

Nosso projeto surgiu através da ideia de disseminar a prática do cultivo caseiro de plantas de porte menor, flores etc. Através de um site intuitivo, nosso objetivo é incentivar qualquer pessoa a ter o seu próprio cultivo, tanto para hobby, quanto para consumo.

Este site pretende também auxiliar seus usuários fornecendo descrições sobre cada planta, sobre a maneira de cultivar e as práticas de cuidado.

CONTEXTUALIZAÇÃO

Conforme a população urbana cresce, áreas que seriam anteriormente destinadas à agricultura são utilizadas para construção de residências, comércios e indústrias, fator que contribui para uma maior dependência de alimentos industrializados e processados. Este fato é resultado da falta de espaço que as áreas urbanas apresentam para criação e das cadeias de suprimento alimentar já existentes que provaram ser fracas durante crises, como a pandemia do COVID-19.

De acordo com o site [CNN Brasil](#) em notícia feita na pandemia “Seis em cada dez domicílios não conseguem manter acesso pleno à alimentação e possuem alguma preocupação com a escassez de alimentos no futuro”.
